

GLOBAL BUSINESS DESIGN

"Through enhancing the power to connect,
we aim for the creation of a society"
in which anyone can make their dreams a reality.

Supporting global businesses By enhancing the power to connect

Operating at around 245 locations in 104 cities worldwide, KDDI supports customers in developing business globally. In order for customers to realize their ideal form and vision, our national staff who are familiar with the local environment and the Japanese Headquarters' staff collaborate locally as well as internationally to offer the best solutions.

Providing a digital platform centered on telecommunications, KDDI will co-create with customers sustainable businesses

With a virtuous circle of digital transformation (DX) where global services that transcend national borders and local services rooted in each region are combined, we work with our customers to develop their global businesses together.

Global Business Experience

Growth of Customers' Businesses on a Global Basis Will Be Attained

- Strengthening of governance/security of overseas sites and affiliates
- Centralized digitalization of customers' global business

Projects That Customers Wish to Realize in All Regions Will Be Supported

- Projects independently planned by overseas local sites will also be supported directly by KDDI overseas local corporations.
- Challenges unique to the overseas market will be dealt with.

To promote sustainable global business, it is important to provide comprehensive support to overseas subsidiaries and group companies as well as to deal with increasingly complex IT environments

As business with different countries becomes more dynamic, striving to respond to risks unique to global business, such as utilizing human resource assets in overseas sites and cyberattacks, is vital.

**STRENGTHENING
GLOBAL IT GOVERNANCE**

**SECURING OVERSEAS
IT HUMAN RESOURCES**

OPTIMIZING GLOBAL NETWORKS

ACHIEVING ZERO TRUST SECURITY

Expanding business in overseas markets requires digital transformation in business and operations incorporating various technologies

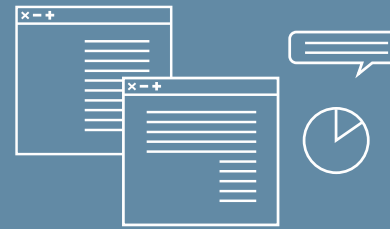

In rapidly changing overseas markets, it is important to improve productivity and efficiency by constantly reviewing the work style and the way that business should be done. To this end, it is also vital to understand the business practices and laws in each region.

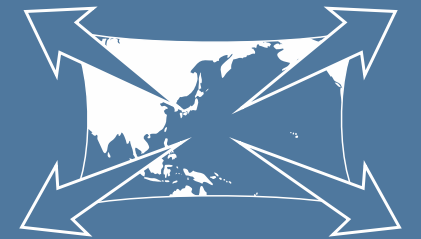

**WORKSTYLE REFORMATION
SMART OFFICES**

**COMPLIANCE WITH EACH
COUNTRY'S REGULATIONS**

**IMPROVING BUSINESS
EFFICIENCY WITH IoT**

**DIGITAL TRANSFORMATION
IN GLOBAL BUSINESS**

BUSINESS
SUCCESS

Enabling the futuristic business infrastructure with its evolving technologies, KDDI will create future businesses with our customers

From investigating assets at overseas offices to deploying and operating a hybrid IT environment that incorporates the zero trust model

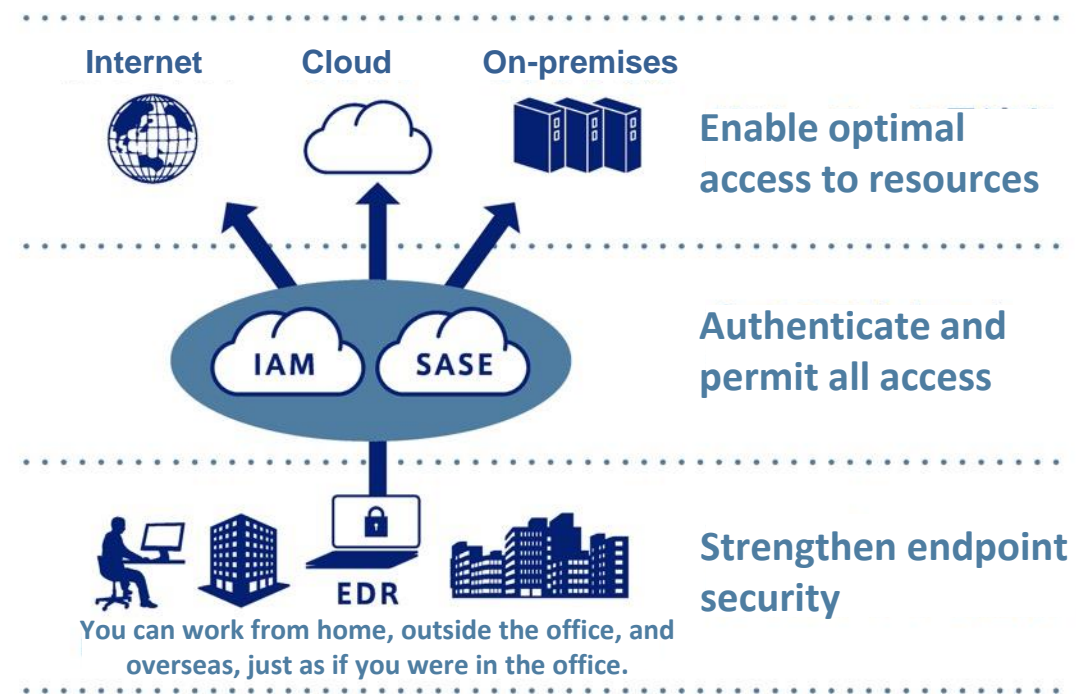

KDDI enables a next-generation platform for “easy, safe, and secure connections at any location” at customers’ offices around the world. We act globally in response to changing work styles, accelerated cloud computing, and threatening cyberattacks.

Cutting costs and strengthening governance by OUTSOURCING IT OPERATIONS at overseas offices

Your dedicated KDDI engineers familiar with the regional IT situation provide centralized support

A hybrid ZERO TRUST SECURITY SOLUTION for flexible configuration

A one-stop solution for all components of overseas offices supports customers with overall operations

A comfortable, efficient office environment that fits diversifying work styles

KDDI supports customers to construct smart offices according to the new way of working and deploy IoT solutions at production sites, which enables customers to build a new global business platform.

En plus des services mondiaux, les succursales de KDDI à l'étranger offrent une gamme variée de services qui tiennent compte des caractéristiques régionales.

EAST ASIA

You can count on us in achieving optimal DX with consideration of cyber-specific laws peculiar to East Asian countries

- Smart office and remote work solutions to support new work styles
- IT operations conducted on behalf of customers with managed operation service
- Creating businesses that utilize data by deploying IoT for the manufacturing factories

SOUTHEAST ASIA

We support Japanese companies aggressively advancing and operating in Southeast Asian region with one-stop diverse solutions

- IoT-based digitalization of production sites
- Total office solutions, from office design to interior finishing
- Improved customers' operations quality with Robotic Process Automation (RPA)
- A secure remote work environment

EUROPE

Telehouse data center enables a business platform in Europe with its high connectivity and outsourcing of operations

- Data center services with the reliable connectivity in Europe
- 24x7 managed operations service to optimize operations
- Support for Japanese companies advancing aggressively in Eastern Europe and Africa
- Providing networks in consideration of the General Data Protection Regulation (GDPR) in an integrated manner

THE AMERICAS

We support customers in North and Latin America and provide software application development solutions for business DX according to the needs

- Developing connected business using IoT platform and eSIM
- Contributing to business process solutions for efficiency and management
- Making proposals to upgrade customers' business through synergy with U.S. companies located on the West Coast
- Security solutions according to the customer's environment

KDDI overseas subsidiaries support customers' overseas offices with enhanced support service.
